

# ZeoCleanse<sup>TM</sup>

## NATURE'S DETOXIFIER

*ZeoCleanse<sup>TM</sup>* contains the amazing all natural mineral Zeolite that has been proven to absorb the toxins, free radicals, and metals from your body, as well as boost the immune system. This mineral has been shown in independent studies to be effective fighting certain types of health issues and is listed by the FDA as Generally Recognized as Safe.\*

# PRODUCT PROFILE

## Directions as a detoxifier:

Take 1 measured teaspoon once a day for at least 30 days.

For an acute health problem: Take 1 measured teaspoon 3 times a day until resolved.

## Ingredients Glossary

**Zeolite:** A natural mineral that has a cage like structure and is negatively charged by nature. The negative charge acts like a magnet to attract toxins and heavy metals into its cage structure and carry them out of the body. It also balances the pH in the body which doesn't allow foreign cells to grow. \*

## Purification, Detoxification, and Purging with ZeoCleanse™

Build-up of toxins, acidosis and heavy metals can damage our bodies. Unbalanced diets, pollution and food additives can all cause toxins and heavy metals to build up in our bodies. This often leads to acidosis causing "clogging" of the cell membranes. In other words, our cells slowly suffocate. Build-up of heavy metals (especially cadmium, mercury and lead) are the cause of many serious medical conditions. The particles of ZeoCleanse™ are so fine that they can actually pass in between the body's cells. Due to its extraordinary adsorption and selection capabilities ZeoCleanse™ binds with toxins and, most importantly, harmful heavy metals, allowing these substance to be easily eliminated from the body. ZeoCleanse™ is often used to eliminate heavy metals like lead and cadmium and to remove build-up of mercury (used in dental amalgam fillings). Due to ZeoCleanse's™ alkaline properties (buffer action) it is also possible to properly regulate the body's balance. But ZeoCleanse™ can do a lot more! It is also a highly effective antioxidant, which means it neutralizes free radicals.

## PRODUCT PROFILE

### Research Brief

Studies have shown that the natural mineral Zeolite has very beneficial uses to live healthy. The mineral has a honeycomb shape that is optimum for filtering toxins. It is also one of the very few minerals that have been negatively charged by nature. This means that in addition to having an excellent shape for filtering toxins, it actually acts like a magnet to attract them. The following is a study that shows how effective the Zeolite ingredient used in *ZeoCleanse*<sup>™</sup> is in detoxifying the body:

***[Sorption characteristics of natural zeolite (clinoptilolite) in biological material in vitro]***

***[Article in Czech]***

***Vrzgula L, Seidel H.***

***The zeolite (clinoptilolite) sorption of arsenic, cadmium, and lead ions from rumen fluid and abomasum juice was investigated in laboratory conditions. Zeolite was found to sorb 91% of lead and 45% of cadmium from rumen fluid in 24 hours. The sorption effectiveness was even higher from abomasum juice where zeolite sorbed 98% lead in 24 hours.***

***PMID: 2554555 [PubMed - indexed for MEDLINE]***

### I never heard of this mineral before, what is it?

*Zeolite is a volcanic mineral which was created when ash and lava from a volcano has a chemical reaction with sea water. The result is a compound with a cage-like structure with a negative charge. The negative charge acts like a magnet to attract positively charged toxins and heavy metals to the Zeolite. These are then trapped in its cage structure and carried out of the body.*

### How safe is Zeolite?

*This form of Zeolite is listed by the FDA as GRAS (generally recognized as safe) and is used in many products that you have probably come in contact with. Zeolite has been shown to be completely nontoxic, even at extremely high dosages.\**

### Will ZeoCleanse™ conflict with any medications that I may be taking?

*Probably not, it contains an all natural mineral. It passes through your system collecting the toxins, and is passed naturally without you even noticing. However, you should always check with a medical professional if you have any concerns about interactions with medications that you are taking.\**

### I have had problems with side effects of other detoxifying products, will I have the same problem with ZeoCleanse™?

*Most detoxifying products have side effects but, **ZeoCleanse™** generally does not have any side effects, although it may vary with certain individuals. ZeoCleanse™ contains the amazing natural mineral Zeolite with a unique structure that has been proven to absorb the toxins, free radicals, and metals from your body, as well as boosting the immune system. This mineral has been shown to balance the body's pH. Foreign cells can not grow in a balanced pH environment. The great thing about using an all-natural and safe product is that it can be taken over and over long term without worry, and only beneficial benefits for your body.\**

**ZeoCleanse™** is specifically formulated, using the form of Zeolite shown effective in the scientific studies, and produced to get the highest quality and most effective health benefits. All the products are manufactured in a licensed pharmaceutical facility under strict quality control.
